

Corporate Fact Sheet

Overview:

- Company founded in 1987.
 - Headquartered in Santa Barbara, California with manufacturing centers in Carpinteria, California and Bangkok, Thailand.
 - Many employees with 10+ year tenure with IntriPlex.
 - Portfolio of more than 30 registered patents developed in conjunction with our customers.
 - Designed, developed, and manufactured components for more than 40% of hard disk drives worldwide.
 - Customer base of the world's leading data storage, semiconductor and medical device OEMs. Currently growing business with expansion into Medical Device, Electronics, Automotive and Defense sectors.
 - Currently producing over 2 million components daily, more than 8 billion in the last 22 years.
 - 95% of all IntriPlex manufactured components began in the IntriPlex Laboratories.
-

Customer Profile:

IntriPlex welcomes new customer inquiries and opportunities. Historically, our customers require small, high-precision components manufactured with challenging design specifications, that scale in volume.

Our Difference:

- Senior scientists and engineers who have a thorough understanding of business and design goals, obstacles, and material limitations. We approach challenges differently than equipment operators just cutting margins.
 - Precision matters. IntriPlex manufacturing tolerances well within specifications with the ability to scale to a staggering level.
 - Innovation, time-tested experience and advanced science and a willingness to work shoulder-to-shoulder with R&D specialists and design teams to improve manufacturing outcomes.
-

Why Work With Us:

- Value-added manufacturing expertise.
 - Senior scientists and engineers who understand management challenges.
 - Flexible and quick with demonstrated record of performance.
 - Consider you our partner and treat you accordingly.
 - High integrity, we're there when the going gets tough.
-
